

MC-5500

Multi-Room System Control

RAPTURE 
Controls with Color

ADA's Rapture series controls are more than just visually beautiful to behold, they are incredible keypads that provide you with everything you need to control your entertainment system. An alphanumeric display indicates system status, volume and tone levels, tuner information*, as well as genre, artist, and song names*⁰. There are no complicated menus and sub-menus, as ADA purposely designed these controls to be intuitive. To listen to a component, simply select the corresponding button and adjust volume if necessary. The other buttons on the keypad now control the device that you selected.

The all new MC-5500 is ADA's most luxurious Gen-II Rapture Series Keypad and features ADA's patented tri-color LED backlight. Buttons can be set to specific light colors based on function. Alternately, buttons can be set to illuminate to the same color with 9 lighting options available.

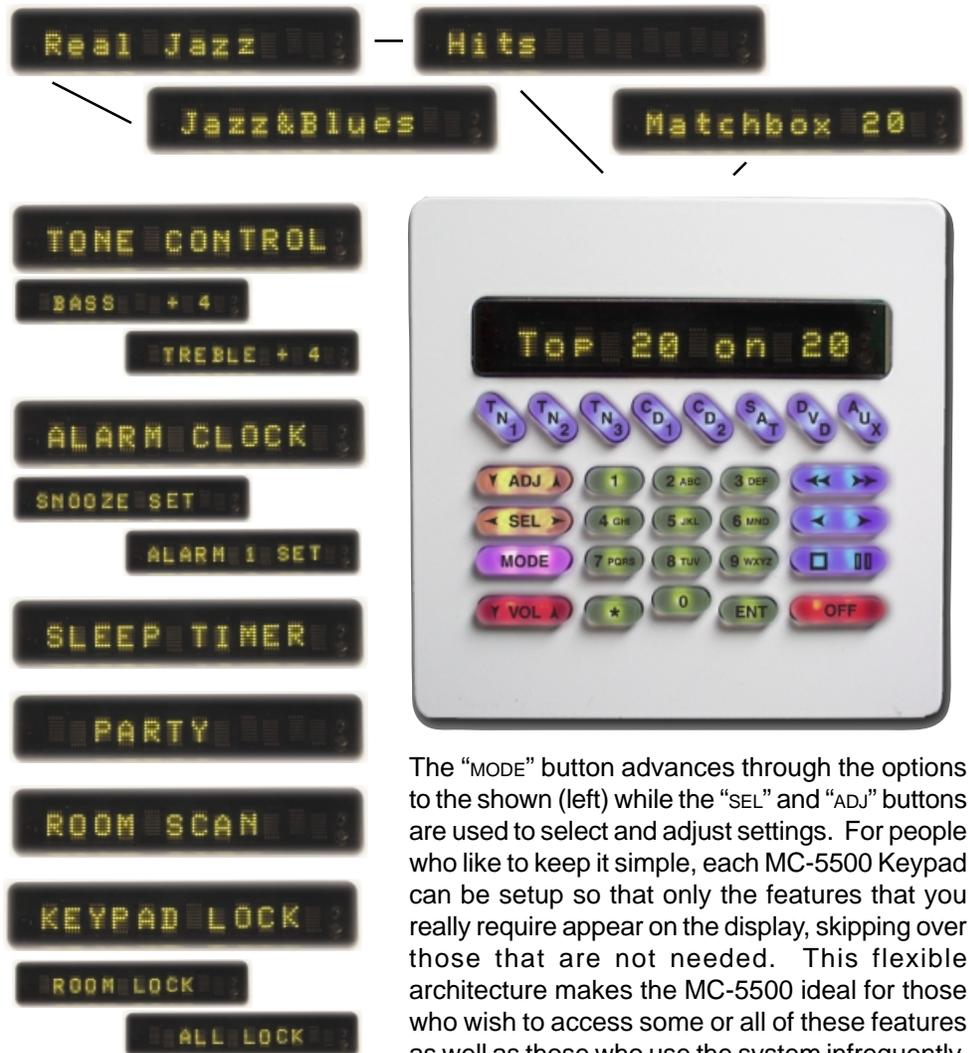

Cosmetically, the MC-5500 comes with a screwless all-metal faceplate that is available in white, ivory, black, or brass. The wall plate can also be custom painted. MC-5500 Keypads are also available in a sleek tabletop all-metal case.

Functionally, the Gen-II Rapture Keypads (MC-4500 & MC-5500) feature a "mode" button that accesses features which include Tone Controls, Tone Presets, Alarm Clock^a, Sleep Timer, Party Control, Volume Set, Room Scan, and Keypad Lock.

^{*}Requires Tune Suite XM and Radio Tuner

⁰Requires Aquarius CD Hardrive Server

^aRequires CMB-1 System Clock

The "MODE" button advances through the options to the shown (left) while the "SEL" and "ADJ" buttons are used to select and adjust settings. For people who like to keep it simple, each MC-5500 Keypad can be setup so that only the features that you really require appear on the display, skipping over those that are not needed. This flexible architecture makes the MC-5500 ideal for those who wish to access some or all of these features as well as those who use the system infrequently.

Life-Style and You
