## Suite 7.1 HD

### SURROUND SOUND PREAMP/CONTROLLER

This isn't just another passing home theater fad: high-definition audio is a secret gem that will enhance your home theater experience as much as high-definition video. If you channel-surf the HDTV channels before ever considering a non-HD broadcast, just one Blu-ray movie on the Suite 7.1 HD is all it will take for you to never go back to plain old DVDs. You, your friends and even your hard-of-hearing brother-in-law, will immediately tell the difference between completely lossless 5.1 and compressed 5.1 (what we have been listening to for the last ten years). And when you are stuck watching TV or regular DVDs, rest assured that the Suite 7.1 HD will decode audio with the clarity and precision you expect from ADA. With 8 HDMI, 4 analog and 8 digital inputs, you can connect up to 20 components to the Suite 7.1 HD, which measures only 1.75 inches in height!
